PROFESSIONAL SUMMARY

Information Science graduate with hands-on experience in designing and developing AI-powered and web-based applications using Java, Python, Flask, JavaScript, SQL, and MongoDB. Experienced in building intelligent software solutions involving log analysis, machine learning, REST APIs, database integration, and full-stack development. Strong understanding of object-oriented programming, data structures, software development lifecycle, and problem-solving with a passion for developing scalable, real-world applications. Seeking an entry-level Software Developer role where I can contribute to building high-quality software solutions while continuously enhancing my technical expertise.

TECHNICAL SKILLS

- **Programming Languages:** Java, C++, C, Python, SQL
- **Frontend Technologies:** HTML5, CSS, JavaScript, Bootstrap, React.js.
- **Backend Technologies:** REST APIs, Node.js, Flask.
- **Databases:** MySQL, MongoDB
- **Artificial Intelligence:** Large Language Models (LLMs), Ollama, Machine Learning, Prompt Engineering.
- **Developer Tools:** Git, GitHub, VS Code, Visual Studio.

INTERNSHIP

Software Developer Intern | Mphasis

Jan 2026 – April 2026

- Contributed to the development of an AI-powered enterprise log analysis application.
- Developed backend modules using Python and Flask for processing multiple log formats.
- Integrated Large Language Models (Llama 3 via Ollama) to automate error classification and root cause analysis.
- Implemented log parsing, normalization, and pattern matching to improve diagnostic accuracy.
- Collaborated with the development team to enhance application performance and improve software functionality.

EDUCATION

Bachelor of Engineering

MVJ College of Engineering, Bengaluru

Nov 2022 – May 2026

CGPA 7.75/10

Class 12, State board

Sir MV PU College, Davangere

June 2020 – May 2022

percentage 75%

PROJECTS

AI-Based Unified Log Analyzer -Python, Flask, AI/LLM Integration (Ollama(llama3:8b)), Log Parsing, Error Analysis

- Built an AI-powered system to analyze log, .log, .dmp, and .etl files for detecting system errors. Implemented log normalization and correlation mechanisms to identify root causes of failures. Integrated LLM-based reasoning to classify errors and suggest fixes. Developed the application using Python and Flask.
- Enterprise applications generate massive volumes of log, crash dump, ETL, and event files, making manual troubleshooting slow and inefficient. The objective was to automate log analysis and provide intelligent root cause identification with recommended solutions.

[AI-Based Unified Log Analyzer](#)

Crop Recommendation System - Python, Flask, Machine Learning, SQL Alchemy.

- Developed a Flask-based web application for crop recommendation using machine learning. Implemented modules to collect soil nutrients, temp, humidity, pH. Integrated a machine learning model to generate crop recommendations based on environmental parameters. Designed user authentication and database storage using SQL Alchemy. Developed responsive web pages for farmers to submit agricultural data and view prediction results.

CERTIFICATIONS

- Basic generative AI, IIT Bombay Spoken Tutorial – Java Training (82.5%).
- Internship certificate (Mphasis).
- Hacker Rank Java, Python, MYSQL Skills Certification. ([Hacker Rank](#))

ACHIEVEMENTS

- Earned HackerRank Skill Certifications in Java, Python, and SQL.
- Successfully completed IIT Bombay Spoken Tutorial Java Training with 82.5% score.
